

Rodrigo Castillejos Malpica

ELECTRONIC ENGINEER

El Salto, Jalisco

☎ (+52) 33-1837-5719 | ✉ castillejosm.rodrigo@gmail.com | 🌐 rodrigocastillejosmalpica

"I am an enthusiastic, self-motivated, reliable, responsible and hard working person. Passionate about electronics. As electronic engineer with over six years of professional experience in electronic manufacturing industry including Test area and with IT knowledge, being part of the development team creating software that meets the needs of clients and users and recently being part of business system analyst team bridging the gap between technology solutions and business needs by working with multidisciplinary teams"

Education

Instituto Tecnológico de Minatitlán

Minatitlán, Veracruz

B.S. IN ELECTRONIC ENGINEERING

2013 - 2017

- Got a degree certificate of completion, diploma, professional title and professional license

Skills

Programming

Python, C/C++, C #, LaTeX, Arduino, STM32, HTML5, CSS, SQL Server, TypeScript, Angular

Software

MATLAB, STM32CubeIDE, KiCad, Altium Designer, PTC Mathcad, PSPICE, LTSpice, Arduino IDE, Visual Studio, Multisim, MS Office, SQL Server Management Studio, TIA Portal, Figma, OrCAD Cadence, Visio

Experience

Jabil Circuit

Zapopan, Jalisco

DIAGNOSTIC TECHNICIAN - TEST ENGINEERING

July 2018 - February 2020

- Reading and interpretation of log files provided by the test equipment (ICT).
- Knowledge and use of measuring tools like DMM (Digital multimeter), DSO (Digital Storage Oscilloscope), LCR meter, Signal Generators, and X-Ray machine for the detection of internal short circuits or voids in ICs and BGAs.
- Experience in ICT area, performing debug test to the boards through ICT fixtures ("Open & short circuits", "Analog", "Boundary Scan Circuit", analysis) and diagnostic according the log file.
- Experience in FVT area testing and inspecting electronic sub-assemblies and assemblies coming from production lines as well as performing their diagnostic.
- Developed failure analysis reports at modular and component level on electronic boards, collecting and analyzing failure data to identify the root cause.
- I programmed firmware on boards and on individual Integrated Circuits
- Ability to read and understand electrical schematics diagrams, component data sheets, BOMs, PCBA layout drawings, technical procedures.
- Implementation of continuous improvement methodology, 5S's, 8D's and Kaizens.

PROGRAMMER ANALYST - IT

February 2020 - March 2022

- Development and maintenance of applications in C# with .NET Framework and Visual Basic for different clients within the company.
- Correction of errors and bugs detected in applications executed in Production environments (PRD).
- Experience and development in Front-End technologies with HTML5, CSS and JavaScript using Angular framework.
- Development of manuals and training materials
- Use of DevOps to automate the work of software development.
- Experience with relational databases with SQL Server and PostgreSQL.
- Familiarity with cloud platforms like AWS.

BUSINESS SYSTEM ANALYST

March 2022 - November 2024

- Constant communication with the product owner (PO) to shape the requirements of the final product (the application).
- Translate the needs of the client/end user into user stories, task and acceptance criteria.
- Use of DevOps to register user stories.
- I prepared documentation (BRD, FSD) to translate client information into technical requirements for the developer.
- Identification of the functional and non-functional requirements of the application.
- Leading work session with customers to develop the business requirements.
- Development of test cases designed to validate the functional and non-functional requirements of the systems.
- I performed UAT tests as required to validate the acceptance criteria.
- Application's implementation to the production environment.
- Use of different Agile/Scrum methodologies.
